Subject.

Handing over of certain piping to the Municipal Commission.

Previous References.

Later References.

S.N. 139.

(A)

Letter No. G.T.1/33, dated the 10th February, 1933,
from the President, Municipal Commission, Civil and Military
Station, Bangalore.

P. u. b.

The President, Municipal Commission, now requests that steps may kindly be taken to allow the Municipal Commission to remove the pipe line laid a few years ago from Hoskote tank to the Yellamallappa chetty tank for use in the Station. Apparently 2/3rd cost of the pipe line should have been met by the Municipal Commission and 1/3rd by the Military Authorities. He further states that the pipe line in question is not in use and is never likely to be required in its present location.

S.N. 139

(A)

of 20/2/33 (C)

The Garrison Engineer, Bangalore, who was consulted in the matter, states that no decision regarding the main in question can be made till a reply is received from Army Headquarters to S.N. 112/A. In para 12 of S.N. 112/A Headquarters, Southern Command have made the following proposals for the disposal of Hessarghatta and Yellamallappa chetty tank rising mains etc:-

12. * * *

It is therefore recommended that

(a) the market value of the Turbanhalli pumping station and plant together with the rising mains and the land upon which they stand should be assessed in detail by the Director of contracts.

From this assessment the value of the Government of India Army Department's interest in the works can be obtained from the proportions of capital costs subscribed by both parties,

(b) this Command be authorised to offer to the Municipal Commission those items which the latter require, at 10% above the assessment, in view of the fact that the value of items of plant etc., on site to the Municipal Commission is probably greater than to any other possible purchaser,

U.O. No. 2691
3rd April 1933

A little late
in the day

Yes. This piping is urgently required. It is now found that Richard Conn & Benson Conn do not get an adequate supply, but we are anxious that the laying of the length of pipe would improve matters immediately. And make it unlikely that there would be shortage of water in any part of the station.

Para 6 ante.

S.N. 148.

~~Part~~
Collection
at 20/4 (A)

Headquarters, Madras District, state that there is some 4000 feet of piping available and there is no ----- likelihood of its being required in connection with the "H" system. Out of the above the Commission would require about 2,800 R.feet of piping.

If approved the Government of India may be asked to transfer this piping, free of cost, to the Municipal --- Commission, Civil and Military Station, Bangalore. In --- order to strengthen the Commission's claim, it appears necessary that we should mention in the letter to the -- Government of India what the Municipal Commission have contributed towards the cost of this piping.

Submitted for orders.

Issued No.10102/690-1931, dated 25-10-33.

Letter No.Gt.1/33 dated the 16th January 1933, from the President, Municipal Commission, Civil and Military Station, Bangalore, to the Garrison Engineer, Civil and Military Station, Bangalore.

I have the honour to state that the Municipal Executive Engineer proposes to lay a 15" in diameter main from the Service Reservoir to the 12" in diameter pipe connection feeding the General Bazaar area in the Station. The work would require about 2,800 Rft. of piping. I request you kindly to let me know at an early date if the Military authorities would allow the Municipality to remove and utilize for this work the pipe line laid a few years ago from the Hoskote tank to the 'Y' Tank which is no longer required.

If the proposed main is laid before the Municipal Commission take over the water supply, the cost of pumping water into the overhead tank on Millers road would be saved, and the supply to the whole northern part of the Station would be greatly improved.

An early reply would be much appreciated.

BANGALORE. ✓

Bangalore Water Supply.

Sir,

L. N. 140.

Reference your No.2027/690-1931, dated 4-3-1933.

1. Intimation has been received from Army Headquarters that 2800 feet of piping may be handed over forthwith to the Municipal Commission on the distinct understanding that they will accept the Director of Contract's valuation.
2. In reply to this intimation it has been explained that the Municipal Commission contributed 4/11th of the cost of the rising main of which this pipe forms part. This figure has been arrived at as follows:-

Total cost of new boiler, pump and main installed in 1912.	Rs.2,77,396/-
Provided by Govt.of India Special grant to Municipal Commission.	Rs.1,00,000/-
Provided by Municipal Commission From loan raised.	Rs. 80,000/-
From Accumulated Deposits Fund.	Rs. 26,251/-
Provided from Military Budget.	Rs. 71,145/-
Municipal share = $\frac{106251}{277396}$ say $\frac{4}{11}$ ths	

3. It has been recommended that 4/11ths of the
total

total piping available should be handed over to the Municipal Commission free of charge; but Army Headquarters may insist ^{that} they should pay for any piping taken at the Director of Contract's valuation less a credit of 4/11th of the total.

If the Municipal Commission will agree to this possible condition now the piping can be transferred to them immediately otherwise further instructions from Army Headquarters, must be awaited.

I have the honour to be,

Sir,

Your obedient servant,

Colonel,

Offg. Commander, Madras District.
